Some guidelines to find your perfect size and style:

1. Print this sheet full size by unchecking "fit to page" or set page scaling to "none" in your printer dialog box. Confirm your printout by measuring the scale in the lower left of the sheet.

2. Set your foot on the outlines. Your heel and toes should be close to the outline for your size without going over - a bit of overhang on the sides is ok!

3. Cut your size out and flip over to check your left foot.
